SCENARIOS PROVIDED BY PARTNERS									
Scenario 2: Creating Art from Waste	P3 EMP	Workshop/Handcraft Room	Creating Art from Waste	<p>Step 1: Introduce the challenge: "Create a beautiful piece of art using discarded bottle caps. Turn waste into a stunning artwork!"</p> <p>Step 2: Display a selection of waste items and art supplies on a worktable.</p> <p>Step 3: Guide the player to combine items to design an art piece. Collage: Cut and glue different paper scraps onto a board.</p> <p>Collage: Arrange the paper scraps, bottle caps, or metal pieces into a pattern.</p> <p>Gluing or taping objects together using a glue gun, eco-friendly adhesive, or tape.</p> <p>Painting: Paint the artwork using spray paint, or natural dyes.</p> <p>Step 4: After the design is submitted, provide feedback:</p> <p>Feedback if correct: "Innovative design! You've created a unique art piece."</p> <p>Feedback if wrong: "Your design needs some adjustments. Try a different combination."</p>	<p>Step 1: Introduce the challenge: "Create a beautiful piece of art using discarded bottle caps. Turn waste into a stunning artwork!"</p> <p>Step 2: Display a worktable with arranged bottles in various colors, sizes, and shapes, along with a baseboard for assembling the artwork</p> <p>Step 3: Guide the player to drag and place the bottle caps onto the baseboard to create a unique, abstract, geometric, or a recognizable image.</p> <p>The player can rotate the caps as needed to form the desired pattern.</p> <p>Player Actions: Select bottle cap. Rotate and place it in a desired position. Rotate and place it in the correct position, the cap will automatically "stick" to the baseboard with a single click.</p> <p>Step 4: Introduce the task: "Craft a simple stool using reclaimed wood. Use your skills to turn waste materials into something functional!"</p> <p>Step 5: Display a worktable with pre-cut pieces of wood and the necessary tools (e.g., hammer, nails, saw).</p> <p>The player will focus on assembling just one project—a wooden stool.</p> <p>Step 6: Guide the player to drag and place the pre-cut pieces in the correct positions to assemble the stool.</p> <p>The pieces will snap together automatically when placed correctly. The player will also be instructed to use the correct tools (but the actions will be simplified, e.g., a single click "hast" the parts).</p> <p>Player Actions: Selected wood pieces. Drag them into place to form the stool. Click to "assemble" the pieces together (without hammering/nailed effect).</p> <p>Step 4: After the assembly is completed: Feedback if correct: "Well done! You've created a sturdy stool from reclaimed wood."</p> <p>Feedback if wrong: "Almost there! Try adjusting the placement of the legs for better stability."</p> <p>Step 5: Introduce the concept: "Repair a smartphone by replacing its broken screen to extend its life and reduce waste!"</p> <p>Step 6: Display a broken smartphone with a cracked screen and a repair toolkit that includes the necessary tools and a new screen.</p> <p>Guide the player to replace the cracked screen with the new one.</p> <p>The player will first remove the broken screen, then clean the new screen, and finally place the new screen in position and snap it into place.</p> <p>Player Actions: Select the broken screen to remove it. Drag and place the new screen onto the smartphone. Clean the new screen and add a screen frame for protection.</p> <p>Step 4: After the screen replacement: Feedback if correct: "Excellent repair! The smartphone is now new with a brand-new screen."</p> <p>Feedback if wrong: "That's not the issue. Try again and make sure to remove the broken screen first."</p>	 	<p>Dialogue 1: "Welcome to the upcycling workshop! Did you know that discarded materials can be turned into beautiful art? Let's create something new from discarded materials!"</p> <p>Dialogue 2: "Combine these materials to create a unique art piece."</p> <p>Dialogue 3: "Great job! You're ready for the next challenge."</p> <p>Dialogue 4 (Correct): "Innovative design! You've created a unique art piece."</p> <p>Dialogue 4 (Wrong): "Your design needs some adjustments. Try a different combination."</p> <p>Dialogue 5: "Excellent creativity! Let's move to the next challenge."</p>		
Scenario 3: Crafting Furniture from Reclaimed Wood	P3 EMP	Workshop/Handcraft Room	Crafting Furniture from Reclaimed Wood	<p>Step 1: Introduce the task of crafting small furniture from reclaimed wood.</p> <p>Step 2: Display various pieces of reclaimed wood and the necessary tools on a worktable.</p> <p>The player selects a project to create.</p> <p>Wooden Chair – Basic four-legged chair with a backrest.</p> <p>Storage Crate – A wooden box for storing items.</p> <p>Small Table – A small wooden table for multiple uses.</p> <p>Step 3: Guide the player to select the right pieces and tools to assemble a new item, such as a stool or small table.</p> <p>Step 4: Once the assembly is complete, provide feedback.</p> <p>Feedback if correct: "Nicely done! Your craftsmanship is on point."</p> <p>Feedback if wrong: "That assembly isn't quite right. Please adjust and try again."</p>	<p>Step 1: Introduce the task: "Craft a simple stool using reclaimed wood. Use your skills to turn waste materials into something functional!"</p> <p>Step 2: Display a worktable with pre-cut pieces of wood and the necessary tools (e.g., hammer, nails, saw).</p> <p>The player will focus on assembling just one project—a wooden stool.</p> <p>Step 3: Guide the player to drag and place the pre-cut pieces in the correct positions to assemble the stool.</p> <p>The pieces will snap together automatically when placed correctly. The player will also be instructed to use the correct tools (but the actions will be simplified, e.g., a single click "hast" the parts).</p> <p>Player Actions: Selected wood pieces. Drag them into place to form the stool. Click to "assemble" the pieces together (without hammering/nailed effect).</p> <p>Step 4: After the assembly is completed: Feedback if correct: "Well done! You've created a sturdy stool from reclaimed wood."</p> <p>Feedback if wrong: "Almost there! Try adjusting the placement of the legs for better stability."</p> <p>Step 5: Introduce the concept: "Repair a smartphone by replacing its broken screen to extend its life and reduce waste!"</p> <p>Step 6: Display a broken smartphone with a cracked screen and a repair toolkit that includes the necessary tools and a new screen.</p> <p>Guide the player to replace the cracked screen with the new one.</p> <p>The player will first remove the broken screen, then clean the new screen, and finally place the new screen in position and snap it into place.</p> <p>Player Actions: Select the broken screen to remove it. Drag and place the new screen onto the smartphone. Clean the new screen and add a screen frame for protection.</p> <p>Step 4: After the screen replacement: Feedback if correct: "Excellent repair! The smartphone is now new with a brand-new screen."</p> <p>Feedback if wrong: "That's not the issue. Try again and make sure to remove the broken screen first."</p>		<p>Dialogue 1: "Let's craft furniture using reclaimed wood."</p> <p>Dialogue 2: "Select the correct wood pieces and tools to assemble a piece of furniture."</p> <p>Dialogue 3: "Focus on assembling the stool."</p> <p>Dialogue 4 (Correct): "Nicely done! Your craftsmanship is on point."</p> <p>Dialogue 4 (Wrong): "That assembly isn't quite right. Please adjust and try again."</p> <p>Dialogue 5: "Great work! Moving on to the next challenge."</p>		
Scenario 4: Repairing Electronics for Reuse	P3 EMP	Workshop/Handcraft Room	Repairing Electronics for Reuse	<p>Step 1: Introduce the concept of repairing electronics to extend their lifespan.</p> <p>Step 2: Display a broken electronic device along with a repair toolkit.</p> <p>Smartphone – Broken screen or cracked issue.</p> <p>Laptop – Faulty keyboard or overheating issue.</p> <p>Radio – No power or poor signal reception.</p> <p>Step 3: Guide the player to identify the faulty component in the device.</p> <p>Replace a Battery (Smartphone/Laptop) – Remove old battery and install a new one.</p> <p>Replace a Screen (Radio) – Soldering or reconnection wires. Replacing a broken screen (Radio). Carefully remove and install a new screen.</p> <p>Step 4: Provide immediate feedback.</p> <p>Feedback if correct: "Excellent repair! You've identified the faulty component."</p> <p>Feedback if wrong: "That isn't the faulty part. Please review and try again."</p>	<p>Step 1: Introduce the concept: "Repair a smartphone by replacing its broken screen to extend its life and reduce waste!"</p> <p>Step 2: Display a broken smartphone with a cracked screen and a repair toolkit that includes the necessary tools and a new screen.</p> <p>Guide the player to replace the cracked screen with the new one.</p> <p>The player will first remove the broken screen, then clean the new screen, and finally place the new screen in position and snap it into place.</p> <p>Player Actions: Select the broken screen to remove it. Drag and place the new screen onto the smartphone. Clean the new screen and add a screen frame for protection.</p> <p>Step 4: After the screen replacement: Feedback if correct: "Excellent repair! The smartphone is now new with a brand-new screen."</p> <p>Feedback if wrong: "That's not the issue. Try again and make sure to remove the broken screen first."</p>		<p>Dialogue 1: "Let's repair this electronic device for reuse."</p> <p>Dialogue 2: "Examine the device and identify the faulty component."</p> <p>Dialogue 3: "Select the part that needs repair."</p> <p>Dialogue 4 (Correct): "Excellent repair! You've identified the faulty component."</p> <p>Dialogue 4 (Wrong): "That isn't the faulty part. Please review and try again."</p> <p>Dialogue 5: "Great job! Let's proceed with the next challenge."</p>		
Scenario 5	P1		Recognizing reusable and recyclable materials	<p>Step 1: Introduce player to the Scenario Type (Upcycling and Crafts). Display workshop environment and text "Scenario Type: Upcycling and Crafts".</p> <p>Step 2: Introduce player to the Scenario Activity (Building something from waste materials).</p> <p>Text: "Activity: Use waste materials to create a new product."</p> <p>Step 3: Introduce player to the Scenario Objective (Upcycling activity).</p> <p>On table: Wooden plank, cloth scrap, plastic bottle, -> trash (incorrect answer)</p> <p>On wall: Design template (e.g. Shelf mockup)</p> <p>Step 4: Show Multiple choice question on 3D object display and let player selects object.</p> <p>->Player selects object: Crumpled paper.</p> <p>A) Good for upcycling (wrong)</p> <p>->Player selects object: Wooden plank.</p> <p>->Show MCQ UI.</p> <p>B) Plastic bottle</p> <p>C) Cloth scrap</p> <p>D) Paper</p> <p>E) Crumpled plastic bag</p> <p>Step 5: Ask player to select the correct answer.</p> <p>->correct: Green Checkmark ->Crafting bar fills</p> <p>->if wrong: Red X ->"That item isn't sturdy enough. Try another."</p> <p>After assembling the shelf: "Shelf Starter" ->finished 3D product animation</p>	<p>VR Crafting Tool: <Blue gun or hammer (grabbable object) Materials (3D Models): <wooden plank <plastic bottle <cloth scrap <paper <crumpled plastic bag</p> <p>Design Mockup (Floating Hologram): Shelf or other upcycled item template</p>		<p>Dialogue 1: We are now here to explore and learn about Upcycling and Sustainable Crafting.</p> <p>Dialogue 2: In our first activity, we will build a new product using discarded materials.</p> <p>Dialogue 3: Please identify the best materials to use for this waste materials. Pick the ones that are most suitable.</p> <p>Dialogue 4: Which material is best to use for this product?</p> <p>Dialogue 5: Well done! You answered it correctly!</p> <p>Dialogue 6: Great job! Let's move to the next challenge.</p> <p>Dialogue 7: Let's go to the next activity!</p>		

Scenario 6	P6	Workshop/Handcraft Room	Upcycling for Handcrafts	<p>Step 1: Introduce the concept of upcycling clothing and its benefits for reducing textile waste and promoting sustainable fashion.</p> <p>Step 2: Show a variety of used clothing items and tools available for upcycling projects.</p> <p>The player selects a project to create:</p> <ul style="list-style-type: none"> Denim Bag: Create a unique bag using denim patches cut from old jeans. T-Shirt Scarf: Transform old t-shirts into a stylish scarf by cutting and knitting. Sweater Pillow: Repurpose an old sweater into a cozy pillow by sewing it shut and stuffing it with filling. Upcycled Jewelry: Create unique pieces of clothing. <p>Step 3: Guide the player in selecting the appropriate clothing items and tools for their chosen project. Provide instructions and tips on sewing, knitting, fabric management, and design.</p> <p>Step 4: Once the upcycling project is completed, provide feedback:</p> <ul style="list-style-type: none"> Feedback if Correct: "Amazing! You've given new life to old clothes, upcycling skills are truly impressive!" Feedback if Wrong: "Something's off with the mixure or shaping. Try again!" 		<p>Dialogue 1: "Welcome to the upcycling fashion studio! Let's transform old clothes into trendy new creations!"</p> <p>Dialogue 2: "Let's get started and gather the tools you'll need."</p> <p>Dialogue 3: "Fantastic! Your upcycled old clothes into a stylish new garment!"</p> <p>Dialogue 4: "You did great! That's not quite right, let's try a different approach to see what we can create."</p> <p>Dialogue 5: "Great job! You've demonstrated the power of upcycling in fashion. Keep creating sustainable styles!"</p>
Scenario 7: Creative	P4	Workshop/Handcraft Room	Building and tuning a simple musical instrument using upcycled household materials	<p>Step 1: Scenario introduction</p> <p>Show a workshop filled with various recycled materials such as tin cans, plastic bottles, or wooden boxes to make drums or string instruments.</p> <p>Step 2: Activity introduction</p> <p>Lesson: "Activity: Build a playable music instrument from recycled materials."</p> <p>Step 3: Show the objects/tools needed in the activity</p> <p>Give the player "Upcycled Music Kit" (visual).</p> <ul style="list-style-type: none"> Tin cans, plastic bottles, or wooden boxes to make drums or string instruments. Rubber bands or metal wires, or old guitar wires - for sound production. Wooden rods or pencils - for drumsticks or frets. Scissors, glue and nail. <p>Step 4: 3D object and multiple choice interaction with questions</p> <p>Scenario 1: (Choosing the base for the instrument)</p> <p>Player selects a material for their instrument.</p> <p>Dialogue 1: "A) Wooden box or tin can (Correct choice - good resonance for sound)</p> <p>B) Paper or cardboard (Incorrect choice - weak sound production)</p> <p>Scenario 2: (Attaching the strings or drum surface)</p> <p>Player secures the rubber bands or drum cover.</p> <p>Dialogue 2: "A) Stretch and attach tightly for good tension (Correct choice)</p> <p>B) Leave it loose (Incorrect choice - poor sound quality)</p> <p>Scenario 3: (Tuning and playing the instrument)</p> <p>Player plucks the strings or taps the drum and adjusts the tension.</p> <p>Dialogue 3: "Tighten the strings or drums to make them sound louder."</p> <p>Step 5: Confirm the user's action</p> <p>Confirm = green checkmark.</p> <p>Dialogue 4: "Well done! You've created a functional upcycled musical instrument."</p> <p>Incorrect Answer:</p> <p>Dialogue 5: "Try again! Make sure your materials produce clear sounds. Once the activity is unlock the 'Eco-musician' badge."</p>		<p>Dialogue 1: "Welcome to our Upcycling Workshop! Today, we'll turn discarded materials into musical instruments."</p> <p>Dialogue 2: "That's right! We're making musical instruments using recycled materials."</p> <p>Dialogue 3: "First, let's choose the base for our instrument. Should we use a wooden box or a tin can?"</p> <p>Dialogue 4: "Great choice! A wooden box or tin can will produce better sound quality."</p> <p>Dialogue 5: "Incorrect! Cardboard isn't the best for sound. Try again!"</p> <p>Dialogue 6: "Now, let's add the strings or drum surface. It's important to stretch them tightly for good tension."</p> <p>Dialogue 7: "Incorrect! Loose materials won't make good sound quality."</p> <p>Dialogue 8: "Now for the fun part!—let's test your instrument! Pluck the strings or tap the drum to see if it sounds good."</p> <p>Dialogue 9: "That sounds amazing! You've successfully upcycled waste into a functional musical instrument."</p> <p>Dialogue 10: "Let's keep upcycling and creating! Are you ready for the next challenge?"</p>
Scenario 8	P2	Workshop/Handcraft Room	Creating a mini vertical garden using plastic bottles	<p>Step 1: Introduce the player to the scenario type</p> <p>Welcome! In this scenario, you'll learn how to give new life to waste materials by creating useful and sustainable objects. This type of activity is called Upcycling for Handcrafts.</p> <p>Step 2: Introduce the player to the scenario activity</p> <p>Today, you'll learn how to build a mini vertical garden using plastic bottles. It's a fun and eco-friendly way to reuse plastic and grow small plants, even in tight spaces!</p> <p>Step 3: Show the objects and tools needed:</p> <p>Empty plastic bottles (2-3), scissors or utility knife, twine or string, glue or hot glue gun, eco-friendly paint, paintbrush, soil, small plants.</p> <p>Step 4: Show 3D object to confirm the activity completion</p> <p>Player places the vertical garden on the ground.</p> <p>Dialogue 5: A realistic "Finish" button appears next to the player's creation, glowing or pulsing slightly to draw attention.</p> <p>Step 5: Acknowledge user's action</p> <p>If player presses the 3D Finish button, text on screen (with confetti animation):</p> <ul style="list-style-type: none"> "Well done!" "You've successfully completed your upcycling project! You turned plastic waste into a vertical garden. Great job!" 		<p>Dialogue 1: "We are now here to explore and learn about Upcycling for handcrafts."</p> <p>Dialogue 2: "For our recycling activity, we will turn used plastic bottles into a vertical garden for small plants."</p> <p>Dialogue 3: "Let's get started!"</p> <p>Dialogue 4: "First, grab a plastic bottle and carefully cut an opening to make space for the soil and the plant."</p> <p>Dialogue 5: "Now, decorate your bottle using recycled paper, fabric, or eco-friendly paint."</p> <p>Dialogue 6: "Once you finish decorating, fill the bottle with some soil."</p> <p>Dialogue 7: "Now gently place your small plant into the bottle and add more soil if needed."</p> <p>Dialogue 8: "Hang the bottle on the wooden frame using twine, then press the button when you're done."</p> <p>Dialogue 9: "You did a great job!"</p> <p>Dialogue 10: "Let's go to the next activity."</p>
Scenario 9	P5	Workshop/Handcraft Room	Crafting with Recycled Materials (Paper Pulp)	<p>Step 1: Introduce the task: Crafting useful everyday items (such as plant pots or pencil holders) using recycled paper pulp.</p> <p>Recycled paper pulp is a mix of paper fibers and other necessary tools (e.g., old paper, blender, molds). The player selects a project to create:</p> <ul style="list-style-type: none"> Pencil Holder - An organizer for pens and pencils. Plant Pot - A container for soil and water storage. Minibowl - A tray for storing keys or coins. <p>Step 3: Guide the player to select the right materials and tools to create their project:</p> <ul style="list-style-type: none"> Soak the paper Blend the pulp Add glue and (optional) natural color Cook the pulp Press, shape, and let dry <p>Step 4: Once the creation is attempted, provide feedback:</p> <ul style="list-style-type: none"> Feedback if Correct: "That's a creative and sustainable piece!" Feedback if Wrong: "Something's off with the mixture or shaping. Check your materials and try again." 		<p>Dialogue 1: "Let's make useful things from recycled paper pulp."</p> <p>Dialogue 2: "Choose the right materials and tools to begin."</p> <p>Dialogue 3: "Great job! That's a creative and sustainable piece!"</p> <p>Dialogue 4: "Correct! That's a creative and sustainable piece."</p> <p>Dialogue 5: "Wrong! Something's off with the mixture or shaping. Check your materials and try again."</p> <p>Dialogue 6: "Excellent work! Let's move on to the next eco-friendly task."</p>
